MEG AND SAM OFFICIALLY MARRIED!!

Back in our second week newspaper, we shared the wonderful news that Meg and Sam were engaged and preparing for their wedding. Yesterday, that long-awaited day finally arrived, and the two officially tied the knot.

According to Sam, the day had its share of unexpected moments. Megan's dress zipper broke, and they almost missed the ceremony, but they made it in time. The ceremony itself was beautiful, and Sam described looking into Megan's eyes while exchanging vows as one of the most nerve-wracking yet amazing experiences he's ever had. The after-party had a few small mishaps, but in the end, everyone was happy and celebrating together.

Meg shared a few words with us about the big day:

"So we almost missed the wedding which was crazy because we were late. But we got married which is cool, it felt like a dream tbh. I put the ring on the wrong hand for Sam, that was embarrassing. I got very nervous and giggled a lot during my vows but looking at him helped me a lot, I love him a lot. Did you know that Sam is very handsome? He looks very good in a suit btw" – Meg

We at the newspaper team are so happy for them and can't help but smile imagining all the happy times they will enjoy together.

They kindly shared some of their photos with our newspaper team,
Congratulations to the happy couple!

“Meg and sam will live happily ever after, im glad I became friends with them they've been very nice to talk to” – AKrow

“I love you cuties and I’m so happy for you!! BIGGEST. O congratulations from me <3” – Anna

New changes to RE and Enivya servers Credit: Mia

In Enivya and RE there are now booster channels where you can show off that you boosted the server, it's a separate channel where only server boosts will be shown and it's a nice way to show everyone that you just boosted the server! Instead of in the general chat.

Now YOU can join the Enivya SMP*

Hello, as some of you may know, we have an Enivya SMP!! If you're an active* and trusted* member of Enivya server and are potentially interested in joining the server, then please message Valentina!! Please consider that breaking the rules of the SMP will result in you being punished severely in the Discord as well.

A clear-up about AI rule

In this article, we're gonna break down RE and Enivya server rule 18: "No form of AI generated content is to be within this server." So, what the hell does that even mean?!

Pretty simple. Anything made with artificial intelligence (like Sora, MidJourney, etc.) is not allowed. The only exception is AI text. That's fine.

There's also a little caveat. You *can* send AI screenshots (like ChatGPT interface screenshots), those are allowed.

10 weeks of newspaper

Hello everyone, publisher here! With this newspaper, we're officially reaching our 10th week together. What started as a small newsletter has grown into something that connects us, has become so important that people start rioting if it's late. It's amazing how much we've done in a short time, thanks to the people working behind the scenes.

I want to give a huge thank you to our team - Valentina, Aspher, AshTheAmethyst, Nimue, Petrah, Mia and Teo - for their dedication and the effort they've poured into every article. Each of them has contributed their time to help us with the newspaper over the past weeks.

And of course, we couldn't have reached this milestone without you, reader. Your support keeps us going. We can't wait to share what's next. Meanwhile, you can help shape future newspaper by sending in your stories through [THE TIP LINE](#) - we love hearing from you and including your voices in our paper.

Computer Science 101: The First Computer Bug in History

I am definitely not doing this due to lack of stories...

In the computer world, bugs are normally the problems developers seek to fix. But it may be surprising to learn that the very first "computer bug" was an actual, physical incident. In 1947, a pioneering computer scientist by the name of *Grace Hopper* was working on the Harvard Mark II, one of the very early *electromechanical computers*. One morning, her team was confused as the machine started acting strangely and giving random errors.

After tracing it down, they discovered the culprit: a real moth stuck in one of the computer's relays. The insect was carefully removed and taped into the logbook with the note: "First actual case of bug being found." And thus, the term "debugging" became part of computer lore, though engineers had been "debugging" problems long before that in other contexts.

Of course, back then bugs were uninvited guests, causing all sorts of unexpected chaos. Today, developers create their own bugs while coding complex software.

So next time your program doesn't work, just remember: bugs will happen. Sometimes they're actual insects, sometimes they're just the ones we created into our code. Either way, debugging remains an essential part of computer science.

Weekly Member Appreciation

Every week, we choose a member to feature in this section for their activity, contributions to the server and/or personal achievements.

THIS WEEKS FEATURED MEMBER IS PLAGUE DOCTOR

“Cool birthday!” – AKrow

“HAPPY BIRTHDAYAYYYA PLAGUE!?’=?!?!?’ I WISH YOU A CHEMICALLY
AWSOME BRIJUTRRUAJDYAY HAPPY BIRTUDAUYYYUYU PLAGUE:P” – Author

“Happy birthday doc!! You’re one of the best people I’ve met in my life and I hope you have a wonderful year ahead!! Thank you for always being there for me. I love you” – Queen Raven (@raven.exe20)

“HAPPY HAPPY BIRTHDAY PLAGUEEEEE !!! HOPE YOU HAVE FUN CURING THE PLAGUE OR SOMETHING” – Mara (@maraaxx)

“i wish plague a very amazing birthday, he is a good guy” – Petrah (@petrahh.)

“HAPPY BIRTHDAY PLAQUE DOCTOR” – icicle (@ici_9100)

“HAPPYYYYYYYYY BIRTHDAYYYYYYYYYY DOCCCCCCC!!!! may chemistry feel much easier and may ur titrations always reach the perfect end point you lab nerd have a great one old man” – aurora (@aurorax_u)

“Best day ever!!! im so happy that my dear teacher gets to celebrate another birthday!! i wish him the best of luck and many good study sessions :3” – Bibi (@cvtebib)
